

I own a combo station in a market of less than 5,000 persons. I am barely breaking even due to the depressed economy of the area (we hardly have any retailers left). Another expense will possible drive me over the edge. We pride ourselves in this community on our public service and maintaining a "G" rating on our programming. The community will let us know if we get our of line and we will either correct it or loose listeners in this very close knit community.
